

## Guard the Yard with Flow-Sensing Technology

As severe droughts prompt water regulations across the country and raise costs, more homeowners are striving for smarter water usage with their irrigation system. Rain Bird® Flow Sensors monitor irrigation and identify when there is a leak or line break so it can be immediately addressed and save water—while earning you a stronger reputation.

**PROVIDES INSIGHTFUL DATA**  
by tracking and improving  
water usage over time

**DETECTS LEAKS EARLY**  
so damaged areas can  
be shut down

**GROWS CUSTOMER TRUST**  
by protecting their  
initial investment

### 3 Reasons Why Homeowners Should Care

- 1
**Pays for Itself**  
Flow sensing is an upfront, low-cost investment.

---

- 2
**A Quick Add-On**  
Installing is easier than ever, so offer it as a straightforward addition.

---

- 3
**Backed by Research**  
Independent studies confirm flow sensing saves water over the system's life.

**35% More  
Water Savings\***

## CHOOSE PROTECTION OVER *COSTLY LEAKS*

Every day, irrigation systems face a number of threats that can lead to leaks and pipe breaks. Left undetected, these costs could add up fast.

### Defend Against Leaks with Affordable Protection

Engineered for residential and smaller commercial applications, the Rain Bird FG100 Flow Sensor is available for less.

#### Property Peace of Mind

Protection that pays for itself after one leak.

#### No Specialty PE-Cable

Simply add the FG100 with 18g irrigation wire.

#### Streamlined Service

Save time and labor, and pinpoint issues faster.

#### Winter Ready

Withstand high-pressure blowouts and keep the FG100 installed all year.

### A Smarter System Connection

Pair the FG100 Flow Sensor with the ESP-ME3 Controller to check system health from anywhere via the Rain Bird Mobile App.
