

ACME CAP

Prevent Debris Hassle: With SJ Caps, bid farewell to pipeline debris. Keep your system running smoothly without the worry of unwanted blockages.

Pressure Without Rotors: Need to pressurize your system? No problem. SJ Caps allow you to build pressure without the need for rotors, ensuring a hassle-free experience.

Flush System Anytime: Flush your system on demand, no rotors required. SJ Caps provide you the flexibility to test and flush.

Shape, Install Rotors Later: Surveying your system? Install rotors after the final shaping. SJ Caps give you the freedom to perfect your design before committing to rotors.

Continuous Installation/Testing: Out of rotors? No need to halt your installation or testing. SJ Caps empower you to keep the momentum going, ensuring uninterrupted progress.

Experience a new level of freedom and flexibility in your installations with SJ Caps
