

PLASSON Pushfit

Pushfit fittings are available in sizes 20mm up to 63mm.

PLASSON Pushfit is a range of innovative push-fit fittings that provide connectivity of Polyethylene (MDPE) pipe to a variety of plumbing pipe materials. Inserting the pipe up to the fitting stop creates both seal and grip on the pipe.

Pushfit fittings are simple to assemble, making the job easier whilst providing the world famous PLASSON reliability.

The PLASSON Pushfit range includes the unique 'C' range, which allows direct connection to copper, pb and pex pipes, 15mm, 22mm and 28mm.

Pushfit is UK Water Reg4 approved and 16 bar rated fitting system when used with an appropriate liner.

KEY FEATURES

- Range of fittings from 20 to 63mm.
- Lightweight and maintenance free.
- Fully demountable.
- 50 year design life.
- Tamper resistant.
- Assembly tools not required, simply push to fit.
- Compact size allows assembly in confined spaces.
- Provides connectivity of polyethylene (MDPE) pipe to MDPE, copper, PB, PEX and imperial pipe.
- Fully end loaded performance so no need to restrain joints.
- PLASSON's standard 7950 pipe liner fits both the pushfit and mechanical range.
